Reynolds & Rowella Kickoff Academy Program to Invests in Firm's Future

August 6, 2015 (Ridgefield, CT) - The partners at Reynolds and Rowella are proud to announce the launch of the Reynolds and Rowella Academy. This program will provide leadership training for Reynolds and Rowella's professional staff with the goal of cultivating their talents as leaders to develop their personal growth and, ultimately, the growth of the firm. Reynolds and Rowella recognizes the importance of investing in their team and developing their professional talents. Dan Harris, a partner at the firm, holds that, "The leadership at Reynolds & Rowella are committed to equipping our team with the skills and resources they need to take the firm to the next level, super serve our clients and community, and develop our firm's future leaders."

Reynolds and Rowella is on the leading cusp of a trend in accounting firms to develop and train their associates through internal development programs. This movement comes as firms realize that an investment in employee development constitutes an investment in the firm's future as a whole. Career development programs have a proven track record of not only improving employee's abilities at present, but also unlocking future potential. Reynolds and Rowella is committed to not merely developing better accountants, but better industry leaders.

Reynolds and Rowella launched the first session for the Academy on July 28, 2015. The 2015 curriculum consists of two tracks, adapted to their associate's needs and management level and skills. This program focuses on equipping their professionals with the skills necessary to grow as strong leaders in the firm and in the community.

Reynolds and Rowella eagerly invited all of its professional staff to join them in the vanguard of this effort to establish themselves as leaders and become forerunners of the accounting industry of tomorrow.
